

# Clontarf/Bantry Bay Estuary Management Plan

# **Final Report**

**Executive Summary** 

May 2008

## **Clontarf/Bantry Bay Estuary Management Working Group**

Manly Council resolved at its Planning & Strategy Committee meeting on Monday 8 May 2006 to establish the Clontarf / Bantry Bay Estuary Management Working Group, as a sub-committee of the existing Manly Harbour Foreshores Management Committee. This Working Group has overseen the development of the EMP with involvement of representatives from the community, Precincts, Aboriginal Heritage Office, Council's Scientific Advisory Panel, Council staff and relevant state government agencies. Members of the Group are:

Group	Representing Organisation	Name
Councillors	Manly Council	Dr. Peter Macdonald
	Manly Council	Dr. Judy Lambert AM
Precinct	Clontarf Precinct	Carlo Bongarzoni
Community		John Connor
		Matt Hayes
		Lyn Green
		Philippa Giles
Aboriginal	Local Government – Aboriginal Heritage Office	David Watts
Govt	Dept of Lands	Stan Rees
	Dept of Environment & Climate Change	Daniel Wiecek
	Dept of Primary Industries (Fisheries)	Paul Schuetrumpf
	NSW Maritime	Anita Robinson
Scientific Advisory Panel		A/Prof Jan Ritchie
Council	Manly Council	Dr. Rafiqul Islam

## Internal Staff Working Group

In order to support the Working Group and to obtain expert contribution in the formulation of the EMP, an *Internal Staff Working Group* was also formed. The present membership of this group is:

Name	Position
Eduard McPeake	Manager, Community & Environmental Partnership Branch
Ted Williams	Manager, Civic Services
Hanno Klahn	Land & Property GIS Officer
-	Precinct Coordinator
Chris Kraus	Bushland Management Coordinator
Michael Diba / Mark Purday	Town Planner / Senior Strategic Planner
Brett Maina	Environmental Education Projects Officer
Judy Reizes	Community Projects Officer, Manly Environmental Centre
Anna Nikolov	Social Planner
Lee Lau	Water Cycle Management Team Leader
Tim Macdonald	Coastal Management Team Leader
Rafiqul Islam	Estuary Management Officer

Contributions of the Clontarf/ bantry Bay Estuary Management Working Group and Internal staff Working group are highly acknowledged. Acknowledgements are also due to Vaughan Middleton, Ted Pirola, Michael Galloway, Dalene Amm, Kym Thrift, John MacRitchie, Justin Shupe, Skye Rose (Manly Council), Phil Hunt (Aboriginal Heritage Office), Karen Kennedy (Sydney Metropolitan Catchment Management Authority), Brian Graham (Department of Water & Energy), Craig Morrison (Sydney Coastal Council Group), James Sakker (Department of Primary Industries) for their contributions and review of the EMP. Scott Macher was Estuary Management Officer during initial stages of formulation of this EMP.

Preparation of this EMP is financed from the Environment Levy of Manly Council and a grant under the Estuary Management Program 2005-06 of the Department of Environment & Climate Change (DECC)

# i. EXECUTIVE SUMMARY

The Clontarf / Bantry Bay Estuary Management Plan (EMP) was adopted by the Council at its Planning & Strategy Committee meeting on 12 May 2008. Prior to this, public exhibition of the Plan occurred during 17 March – 21 April 2008 and a final endorsement of the Plan by the Clontarf / Bantry Bay Estuary Management Working Group on 28 April 2008. Supporting documents include an Estuary Processes Study describing the baseline condition and an Estuary Management Study describing management objectives, options and impacts. These documents were finalised in August and November 2007, respectively.

## **About the Plan**

This Plan is prepared through the process outlined in the NSW Estuary Management Manual. Extensive community consultation was initiated through establishing a community participated Working Group and conducted through mechanisms including, display panels, information sharing through Precinct newsletters and Council's webpage, formal questionnaire surveys and community Field Days.

This Plan addresses the portion of the Middle Harbour estuary and foreshore that aligns with the Manly Local Government Area border. The study area covers 350 hectares, with a perimeter of 11.5km, and takes in the suburbs of Balgowlah Heights, Clontarf and Seaforth. The entire study area is covered within the Sydney Harbour Foreshores and Waterways Area and also within the Sydney Metropolitan Catchment Area.

The Plan has been developed in response to legislative requirements and community issues in accordance with current best practices for the management of estuaries and its catchment. The development of an Estuary Management Plan is identified in Manly Plan 2007-2010 and Sustainability Strategy 2006.

Preparation of this EMP fulfils implementation of Action C1.3.4 (*Establish a Community Working Group and undertake Estuary Management Plan for Clontarf and Bantry Bay coastline areas*) of the Manly Sustainability Strategy.

The Plan addresses the following 10 broad based key issues, derived from community consultations:

- Water quality & pollution,
- Aquatic/intertidal habitat conservation & management,
- Bushland/terrestrial habitat conservation & management,
- Sedimentation & beach erosion,
- Hazards & risks including climate change,
- Estuary use,
- Access,
- Foreshore infrastructure & facilities,
- Heritage conservation & management and
- Monitoring.

The Plan has been developed under the following vision statement:

"A thriving community, enhanced by heritage and lifestyle, where residents and visitors work together to live in harmony with the unique natural environment, both on land and in the sea."

This Estuary Management Plan is a strategic plan with a long-term time frame of 15-20 years and firmed up implementation program of 5 years. This plan will be reviewed and revised every 5 years and a new implementation program will be adopted in line with priorities of the period.

This Estuary Management Plan has evolved through incorporation of strategic directions from a number of Council's management documents and land use planning instruments. In order to embed estuary management as part of Council's core business, the adopted Plan will link into documents such as: Manly Plan, Manly Sustainability Strategy, Manly Social Plan, Coastline & Estuary Management Plans, Manly Local Environmental Plan, Development Control Plans (DCPs), and Plans of Management.

## Strategic Framework & Management Strategy

A series of goals and objectives for the future management of the Clontarf/Bantry Bay Estuary were developed on the basis of information received through community and stakeholder consultation. For each management issue a goal has been defined, along with a range of management objectives that have been further translated into management options. The Plan follows the four basic principles of Ecologically Sustainable Development (ESD) and also considers the State Plan, state-wide targets set by the Natural Resources Commission and regional targets set by the Sydney Metropolitan Catchment Management Authority (SMCMA).

This Plan sets 10 Goals and 35 Objectives to be addressed through 85 Management Options (**Table A**). Only 53 of these are new activities. Of these 53, 15 management options are proposed for immediate implementation, 25 within 2 years, 12 within 3-4 years and only 1 at later years. Overall, 22 management options have been rated to have high priority, 56 as medium priority and only 7 as low priority.

## **Strategic Management Options**

Strategic management options cover a wide range of structural and non-structural solutions. These are briefly summarised here addressing each of the 10 key management issues.

## Options addressing Water Quality & Pollution

A total of 12 management options are proposed (Table A) to address five objectives: reduction of pollutant loads, sewage discharges, sustainable use of groundwater; pollution levels at public swimming enclosures and continuation of education programs.

Five of these are high priority management options and relate to continuation of existing GPTs (Gross Pollutants Traps), formulation of comprehensive Stormwater Management Plan, confirmation of location of sewage overflow points and managing *feacal coliform* and *enterrococci* levels at public swimming enclosures. The remaining seven management options have medium priority.

Four of the management options are on-going activities. Four options that have been proposed for immediate implementation relate to confirmation of location of sewage overflow points, addressing high *feacal coliform* and *enterrococci* levels at Sangrado swimming enclosure and investigations/survey into groundwater and greywater use in the study area.

#### Options addressing Aquatic/Intertidal Habitat Conservation & Management

A total of 14 management options are proposed (Table A) to address five objectives: preserving seagrass beds, eradication of *Caulerpa taxifolia*, maintainance of existing mangrove population, protection of areas of ecological significance and investigation into factors affecting areas of high ecological value.

Only one high priority management option relates to increased enforcement of boating restrictions over seagrass beds. Further ten management options have medium priority.

Six of the management options are on-going activities. Two options that have been proposed for immediate implementation relate to enforcement of boating restrictions on seagrass beds and implementation of 'Fisher Bay Mangrove Expansion Program'.

### Options addressing Bushland/Terrestrial Habitat Conservation & Management

A total of 10 management options are proposed (Table A) to address three objectives: continuation of Council's bushland management program, establishment of native vegetation corridors and encouraging community participation.

There are no high priority management options identified. However, nine management options have medium priority. Six of the management options are on-going activities. One option that has been proposed for immediate implementation relates to identification of adhoc tracks from private properties.

## Options addressing Sedimentation & Beach Erosion

A total of three management options are proposed (Table A) to address two objectives: to gain a comprehensive understanding on estuarine sediment transport patterns and mitigating foreshore accretion/erosion processes.

All three management options have been rated as of high priority and relate to a comprehensive study on estuarine sediment transport patterns, mitigation measures for erosion prone sites and addressing siltation of the Clontarf swimming enclosure.

None of the management options are on-going activities. One option that has been proposed for immediate implementation relate to a comprehensive study on estuarine sediment transport patterns.

#### Options addressing Hazards & Risks including Climate Change

A total of seven management options are proposed (Table A) to address two objectives: identification of existing and potential hazards and implications of sea level rise.

Only one high priority management option relates to preparing Council's policy and strategy documents incorporating the 4<sup>th</sup> IPCC and other regional and national projections. The remaining six management options are each categorised in medium priority.

One of the management options are on-going activity. One option that has been proposed for immediate implementation relate to assessing stability of seawalls protecting public lands.

## Options addressing Estuary Use

A total of 13 management options are proposed (Table A) to address three objectives: safe and enjoyable public areas, encouraging boating use and supporting recreational fishing.

Of them, three high priority management options relate to installation of adequate waste recycling stations, supporting jetski and commercial fishing bans. The remaining 10 management options are each categorised in medium priority.

Eight of the management options are on-going activities.

## **Options addressing Access**

A total of four management options are proposed (Table A) to address three objectives: maintenance of the Manly Scenic Walkway, increased disabled access and facilitation of dog-walking.

One high priority management option relates to installation of adequate dog faeces bins and bag dispensers. Two management options are categorised in medium priority.

Two of the management options are on-going activities of the Council.

## Options addressing Forshore Infrastructure & Facilities

A total of eight management options are proposed (Table A) to address five objectives: rationalisation of mooring places, construction of public boats landing facilities, establishing dinghy and kayak storage facilities, improvement of usability of public swimming enclosures and betterment of general amenities.

Four high priority management options relate to installation of dinghy and kayak storage facilities, restoration of collapsed Sangrado swimming enclosure and enhancement of general amenities such as public toilets and street lights. The remaining four management options are each categorised in medium priority.

Two management options are already on-going activities. Four options that have been proposed for immediate implementation relate to construction of a public floating pontoon, installation of dinghy storage, installation of rods to tie boats and restoration of collapsed Sangrado swimming enclosure.

#### Options addressing Heritage Conservation

A total of eight management options are proposed (Table A) to address three objectives: protection of all 22 sites of Aboriginal heritage significance, identification of all sites of natural and cultural heritage and increased community awareness.

Two high priority management options relate to construction of protection structure to an Aboriginal midden at Sandy Bay and prevention of damage to Aboriginal middens in critical conditions. Four management options are categorised in medium priority.

Four of the management options are on-going activities. One option that has been proposed for immediate implementation relate to construction of protection structure to an Aboriginal midden at Sandy Bay.

## **Options addressing Monitoring**

A total of six management options are proposed (Table A) to address four objectives: development and implemention of a Monitoring Program, monitoring public use of the estuary, establishing community monitoring and use of monitoring results to revise the EMP.

Only one high priority management option relates to monitoring the environmental health of the estuary. The remaining five management options are categorised in medium priority.

None of the management options are on-going activities. One option that has been proposed for immediate implementation relate to monitoring of use of the Manly Scenic Walkway.

#### Funding Requirements

The total cost of implementing (including 1-5 years of operation and maintenance) the 85 management options addressing 10 key management issues is approximately \$2.10 million (**Table B**). An estimated \$ 406,000 will be required to implement 15 options proposed for immediate implementation.

Table B: Summary of estimated cost

Management Issues	Number of	Estimated Cost (\$)						
	Management Options	High priority	Medium Priority	Low priority	Total			
Water Quality	12	134,000	299,000	0	433,000			
Aquatic Habitat	14	10,000	59,000	0	69,000			
Terrestrial Habitat	10	0	175,000	0	175,000			
Sedimentation & Erosion	3	210,000	0	0	210,000			
Hazards & Risks	7	0	80,000	0	80,000			
Estuary Use	13	55,000	210,000	0	265,000			
Access	4	20,000	100,000	0	120,000			
Foreshore Infrastructure	8	383,900	86,000	0	469,900			
Heritage Conservation	8	40,000	46,000	5,000	91,000			
Monitoring	6	130,000	54,000	0	184,000			
	85	982,900	1,109,000	5,000	2,096,900			

Some actions require an on-going commitment from existing staff rather than the outlay of expenditure and this is noted as 'Time'. Some recommended actions require significant capital costs, especially where large-scale works are involved such as restoring collapsed swimming enclosure and foreshore protection structures.

As indicated elsewhere, implementation responsibility of all proposed management options rests with a number of agencies including Manly Council. Hence, adoption of this EMP does not commit Council to allocate immediate funding. Funding from different alternative sources will be pursued. These include but are not limited to:

- Council's Environment Levy (subject to a budget bid process);
- Council's General Revenue Budget (subject to a budget bid process);
- State Government's Estuary Management Program (50% subsidy funding subject to a submission process);
- NSW Coastal Catchments Initiative; and

• Other Commonwealth and State Government funded programs.

## **Implementation Plan**

**Agencies involved:** Manly Council (MC) is the principal implementation/management agency of the Clontarf/Bantry Bay Estuary Management Plan. Responsibility for implementing the options is spread across local government (planning, management and works staff), state government agencies and volunteer community groups **(Table C).** The following agencies will be involved in implementation of one or more relevant management options either in the main or supporting roles.

- Department of Environment and Climate Change (DECC);
- NSW Maritime;
- Department of Primary Industries (DPI);
- Sydney Water;
- Department of Water & Energy;
- Sydney Coastal Councils Group (SCCG);
- Aboriginal Heritage Office (AHO);

Other agencies likely to be involved are Sydney Metropolitan Catchment Management Authority (SMCMA), SES and RTA.

**Implementation Time frame:** Of 85 management options proposed in this EMP, 32 options are on-going activities of the Council and/or other agencies. Among newly proposed 53 options, 15 have been proposed for immediate implementation (**Table D**), 25 within two years, 12 within 3-4 years and only 1 on 5<sup>th</sup> or later years.

**To be incorporated into the Manly Plan:** The management options proposed in this Estuary Management Plan will gradually be mainstreamed in to the rolling three year Manly Plan. The Manly Plan is the key planning document driving the operations of Council. Efforts will be made to incorporate priority options in to the next Manly Plan 2008 – 2011 and subsequent Plans.

Collaborative Partnership with other agencies and neighbouring Councils: Manly Council, as being the main implementor of the EMP, plans to conclude collaborative partnership agreements with other relevant agencies and neighbouring Councils either specifically for this EMP or for overall LGA. Manly Council has signed a Memorandum of Understanding 'Manly Council and Sydney Water Partnership' in July 2000 to work together to achieve, within the framework of Total Catchment Management and Ecologically Sustainable Development. Similar agreements can be initiated with other agencies.

Manly Harbour Foreshores Management Committee to coordinate: Manly Harbour Foreshores Management Committee, from which the Clontarf/Bantry Bay Estuary Management Working Group was formed, will co-ordinate implementation of the EMP. The Committee, reconstituted to accommodate a number of Coastal/Estuary Management Committees/Working Groups will be serviced by the Coastal Management Team of Council

**Opportunities for community involvement:** Many of the management strategies adopted for Clontarf/Bantry Bay estuary offer opportunities for community involvement particularly activities such as revegetation projects, participatory monitoring programs and environmental education, as well as general monitoring of plan implementation and effectiveness.

**Reporting through three mechanisms:** Reporting on implementation of the EMP will be achieved through four mechanisms: internal Council reporting process, Annual Reports to the community, Council website and regular Harbour Foreshore Committee meetings.

**EMP to be reviewed every 5 years:** The Estuary Management Plan will be reviewed every 5 years to accommodate priorities of the period, requirements of new/amended legislations and Council's policies and guidelines. During the process, there will be a mechanism to identify new issues and conflicts concerning the estuary management and ensure their incorporation into a revised plan. A program for the following 5 years will

be developed by designating priority to any new actions and reassigning priority to the remaining actions. These programs should be fed back into and form the revised EMP for the next 5 years.

Table C: Roles of different agencies in implementation of proposed management options

	ifferent agencies in implementation of proposed n	
Agency	Management Options with Implementation Respons	
	Main	Supportive
Manly Council*	WQ1.1#, WQ1.2, WQ1.3, WQ1.4, WQ2.1, WQ4.1, WQ4.2, WQ4.3, WQ4.4, WQ5.1, AH3.1, AH3.2, AH3.3, AH4.1, AH4.2, AH4.3, AH4.4, AH5.1, AH5.2, AH5.3, TH1.1, TH1.2, TH1.3, TH1.4, TH1.5, TH2.1, TH2.2, TH3.1, TH3.2, TH3.3, SE1.1, SE2.1, SE2.2, HR1.1, HR1.2, HR2.1, HR2.4, EU1.1, EU1.2, EU1.3, EU1.4, EU1.5, EU1.6, EU2.1, EU2.4, EU2.5, EU3.1, AC1.1, AC1.2, AC2.1, AC3.2, Fl3.1, Fl3.2, Fl4.1, Fl5.1, Fl5.2, HC1.3, HC2.1, HC2.2, MO1.1, MO1.2, MO1.3, MO2.2, MO3.1, MO4.1,	WQ3.1, WQ3.2, AH1.1, AH1.2, AH2.1, AH2.2, HR1.3, HR2.2, HR2.3, EU2.3, AC3.1, FI1.2, FI2.1 HC1.1, HC1.2, HC1.4, HC3.1 TH3.3, HC3.1,

Table D: Management Options proposed for immediate implementation

SI.	Management Options	Responsible	E	stimated Cost (\$	)	Remarks
No.		Agencies	Capital	Operational	Total	
	High Priority					
1	<b>SE1.1.</b> Carry out a comprehensive study on estuarine sediment transport patterns (Study to be combined with HR 1.2)	MC (NR), DECC	0	50,000	50,000	50% DECC grant approved
2	FI3.1. Install horizontal dinghy and kayak storage racks at Sandy Bay in consultation with nearby residents and dinghy owners.	MC (US, Design & Technical)	7,000	4,000	11,000	
3	<b>FI4.1.</b> Assess and implement options to restore collapsed Sangrado swimming enclosure.	MC (US)	150,000	0	150,000	
4	AH1.2. Encourage NSW Maritime and DPI (Fisheries) to increase the enforcement of boating restrictions over seagrass beds. Develop interpretative signage to notify seagrass beds as protected areas.	DPI (Fisheries), NSW Maritime, Manly Council- NR, SMCMA	0	10,000	10,000	
5	<b>FI3.2.</b> Install rods/poles at Gurney Crescent & Castle Circuit to tie dinghies & kayaks and educate owners regarding protection of trees & middens, and decrease erosion of foreshore	MC (US, CEP), Precincts	2,000	900	2,900	
6	WQ3.2. Investigate & seek to address possible sources of high faecal coliforms and enterococci levels in Sangrado swimming enclosure.	Sydney Water, MC (NR)	0	2,000	2,000	
7	<b>WQ2.1.</b> Confirm, with Sydney Water, the presence of all sewage overflow points within the Clontarf / Bantry Bay study area including the five known ones.	Sydney Water, MC (NR)	0	0	0	Already implemented
8	HC1.2. Construct boardwalk type structure where MSW bisects Aboriginal midden at Sandy Bay.	MC (P&R), AHO	0	0	0	Already implemented
	Medium Priority					
9	<b>WQ4.1.</b> Undertake a comprehensive study on Clontarf groundwater aquifer to identify present extraction rate, recharge and other relevant issues.	MC (NR), DWE	0	45,000	45,000	
10	WQ4.3. Assess current greywater direct diversion (GDD) uptake within Manly Council (including the study area) through undertaking a residential survey.	MC (S&C, NR & CEP)	0	10,000	10,000	Student project
11	HR1.2. Undertake inspections to assess stability of seawalls protecting public lands. If upgrading is required, promote eco- friendly sea walls.	MC (US & NR)	0	0	0	HR 1.2 and SE1.1 will be a combined study
12	FI2.1 Construct a public floating pontoon beside Sangrado swimming enclosure and encourage NSW Maritime to assess for other boat landing facilities within the study area	MC (US), NSW Maritime	50,000	20,000	70,000	Partial funding received from NSW Maritime
13	MO2.1. Monitor use of the Manly Scenic Walkway.	MC (P&R)	0	10,000	10,000	Student project
14	AH3.2. Design and implement, the 'Fisher Bay Mangrove Expansion Program'.	MC (P&R), DPI (Fisheries)	30,000	15,000	45,000	p. 0,000
15	<b>TH1.3.</b> Identify adhoc tracks from private properties entering bushlands and approach property owners to ensure their safety and continued maintenance at an appropriate and specified standard.	MC (P&R)	0	0	0	Staff time
		Total	239,000	166,900	405,900
