

Permit Parking Schemes – Permit Holders

Manly Council has a choice of permit holders for our residents to use to display their parking permits in their vehicles. All permits must be displayed in holders.

Adhesive Permit Holder

The adhesive holder will permanently adhere to the windscreen of a vehicle and is suited to users needing to display a permit on the same vehicle on a full time basis. The permit can be removed from the holder when required, leaving the holder in place.

Permits should be displayed at the base of the windscreen, on the passenger side. Ensure the inside of the vehicle windscreen is clean. Peel the two adhesive strips from the permit holder and press the strips onto the windscreen. Slip your valid permit into the pocket in the holder.

The Council logo and property details on the front of the permit must face forward and remain visible though the windscreen when on display in the holder. You may leave the permit holder in place when driving.

Suction Cap Permit Holder

The suction cap holder is ideal for visitors, trades people and people parking in permit areas on a less regular basis. The holder is easily swapped between vehicles.

Permits should be displayed at the base of the windscreen, on the passenger side. Ensure the inside of the vehicle windscreen is clean. Press the holder's suction caps to the base of the windscreen. Slip your valid permit into the pocket in the holder.

The Council logo and property details on the front of the permit must face forward and remain visible though the windscreen when on display in the holder. You may leave the permit holder in place when driving.

Hook Holder

Although Council is no longer stocking the hook shaped permit holders, you may continue to use them to display your permits. Hang the holder from the rear vision mirror of the vehicle only when parked. Ensure that you **always remove the holder when driving**.

Trailer Permits

Trailer permits must be permanently affixed to the registered trailer in a suitable holder, such as those used to display trailer registration.
